Mission

Hairston Middle School is committed to developing social change agents. We commit to just practices that “unearth” the genius that resides in every student, within a safe, orderly and culturally affirming environment.

Vision

Hairston Middle School will be an exemplary school committed to the academic, social and emotional growth of each individual in a nurturing and caring educational environment.

We are an educational institution that focuses on Innovative Sciences by providing a curriculum emphasizing science, technology, arts, engineering, and mathematics. Our goal is to prepare students for careers in these fields by offering hands-on learning experiences while incorporating these concepts in all core curriculum. We aim to foster critical thinking, problem-solving skills, and creativity in our students through a multidisciplinary approach to education.
