

INSTRUCTIONAL STRATEGIES TO SUPPORT MULTILINGUAL LEARNERS IN THE MATHEMATICS CLASSROOM

This session will focus on effective instructional strategies that support multilingual learners in accessing rigorous academic content that is introduced during the second semester of the school year. This series will focus on research-based practices that promote language development, accessible learning experiences, and student engagement in mathematics. Educators will explore practical techniques for scaffolding instruction, fostering a language-rich classroom environment, and differentiating support to meet the needs of multilingual students. Through collaborative discussions and hands-on activities, participants will gain the tools and confidence to implement strategies that enhance both language acquisition and content mastery.
