Request for Proposal Clarification
26.05 Energy Performance Contracting Services

Addendum 1

QUESTIONS:

1. In the RFQ document, it states that you are seeking “qualified firms, that are approved by the State of Michigan, to provide Energy Savings Performance Contracting Services (ESPC).” Could you clarify what criteria or process determines whether a company is considered approved?
Answer: The intent of the requirement is for firms that meet the requirements of providing Energy Performance Contracting Services in the State of Michigan and has therefore completed projects in the State of Michigan. We are not looking for firms that only meet the qualifications of providing Energy Performance Contracting Services in the State of Michigan but have provided and or completed Energy Performing Contracting Services in the state of Michigan.
2. What is the percentage cooled of each facility listed in Appendix A of the RFQ?
Answer: We don’t have an exact percentage calculation but you can assume that approximately 90% of the district is cooled.
3. At the pre-bid meeting it was indicated that no pricing will be required, as this submittal is a request for qualifications only. Considering this, please clarify what information the District is wanting to see in Section C. Approach, Item #3, as shown below. 3. Provide a list of the costs and fees that are or will be included with your effort in providing Energy Performance Contracting services. Provide cost information on the following: a) current hourly charge rates for your staff and personnel, b) overhead costs, c) profit and fees, etc. that will be charged to projects or any part of the program?
Answer: Since no defined scope has been determined, we can’t ask for accurate costs for the project. However, when selecting a firm, we will be considering their charge and billing rates, which is what was asked to be provided. This is not the sole determining factor but may be a consideration as part of the overall selection of a firm.
4. At the pre-bid meeting, it was indicated that a bid bond is not required for this submittal. Please confirm that the bid bond requirement, as it is stated on page 6 of the request for qualifications, will be removed via amendment?
Answer: As noted in the Pre-bid meeting, the requirement for a Bid Bond will be waived.
5. During the 9/25/2025 Pre-bid meeting, it was discussed that the bid bond requirement would likely be removed and an addendum re-issued. Is it still the case that the bid bond is

no longer required, or should we plan to include a bid bond?

Answer: As noted in the Pre-bid meeting, the requirement for a Bid Bond will be waived.

6. Rochester Community Schools is requesting a bid bond of 5% of the bid be turned in with this response. Since there is no "bid" or final project scope, pricing etc. established for this project to base this percent on, would it be satisfactory to provide proof that respondent has sufficient capacity and resources to bond any construction project resulting from this RFQ?

Answer: As noted in the Pre-bid meeting, the requirement for a Bid Bond will be waived.

7. The RFP references firms "approved by the State of Michigan" to provide Energy Savings Performance Contracting services. Willdan is NAESCO-accredited, which-based on the State's Energy Performance Contracting process-qualifies firms as "approved" Energy Service Providers. Could the District please confirm that NAESCO-accredited firms are considered eligible under this requirement?

Answer: The intent of the requirement is for firms that meet the requirements of providing Energy Performance Contracting Services in the State of Michigan and has therefore completed projects in the State of Michigan. We are not looking for firms that only meet the qualifications of providing Energy Performance Contracting Services in the State of Michigan but have provided and or completed Energy Performing Contracting Services in the state of Michigan.

8. Please clarify, is pricing or categorical percentages required as part of the RFQ response? If so please identify all categories so that each company provides the same?

Answer: Proposals will be based on the 4 criteria listed in the RFQ, A - D: A) Company history of providing Energy Savings Performance Contracting Services, in particular the experience with providing these services to K-12 and Michigan clients. B) Company & Team experience, C) Company's Approach to providing Energy Savings Performance Contracting Services. D) Provide a list of references from completed Energy Savings Performance Contracting Services projects. Please respond to the particular requirements detailed in each section in the RFQ.

9. Please confirm, bidders must only include references for projects that their company has implemented. Not for projects, an individual on their team, implemented while at another energy company?

Answer: For the section on 'Company History' we are looking for a list of projects that were completed by the firm that is submitting a proposal. For the section on 'Team Experience', you can list the individual team member's experience, which may have included experience working on Energy Savings Performance Contracting Services projects at other firms.

10. Can the District please provide the individual 12 months of electricity and natural gas bills that feed into the annual summaries that were provided in Appendix A of the RFQ? This information would allow bidders to perform a more detailed, weather-adjusted analysis. If the District uses EnergyStar portfolio manager, we can provide our account information so each facility's monthly electricity and natural gas bills can be shared through that platform?

Answer: Refer to the attached monthly gas and electric cost for each building from October 2023 through August 2025. Please note that we are not expecting a firm estimate as the scope is not fully defined based on available information and detailed walk throughs. As noted in the RFQ we are only looking for an approximate value of

the program based on the limited information provided.

END ADDENDUM

Property Name	Meter ID	Meter Name	Meter Type	Start Date	End Date	Usage/Quantity	Usage Units	Cost (\$)	Estimation?
Transportation Building	135640174	Electric Grid Meter	Electric - Grid	10/21/2023	11/20/2023	7261	kWh (thousand Watt-hours)	1094.57	No
