

Umpqua Community College Healthcare & Public Safety Event

Thirty seven juniors and seniors attended Umpqua Community College's Healthcare and Public Safety Event on Tuesday, December 10th. The event kicked off

with a keynote speech in UCC's Jacoby Auditorium from Russell Woolley, President of CHI Mercy Health, and continued with four engaging and hands-on sessions of their choice in the fields of healthcare and public safety. Students were able to participate in everything from learning about a career as a dietician and making healthy smoothies, to learning how to control a severe bleed in an emergency situation and practicing lifesaving techniques! At the conclusion of the sessions, there was a professional panel made up of a sheriff, judge, and orthodontist, with students having the opportunity to ask questions about what shaped their career pathway choices in their respected professions. Riley Templeton, a YHS junior, felt like it was an incredibly valuable experience, sharing that "I honestly really liked it, and I'm definitely hinking about a future career in radiology now." Students also enjoyed a lunch of Panda Express, Subway, and Taco Bell (all compliments of UCC), and a few of our students came away with some pretty amazing career-related prizes. A fun and educational day was had by all!

Christmas Spirit Week

Yoncalla School District Priorities

1. Each student will enjoy positive, engaging learning environments.
2. Each child will possess the knowledge and skills necessary to be successful in post secondary education and careers, and the self-reliance to be a productive citizen.
3. A strong sense of community is recognized and nurtured among all stakeholders
4. Facilities and finances are managed effectively and efficiently for the benefit of each child.

FIRST TECH CHALLENGE TEAM #25821 "CYBER EAGLES"

We are one of the new teams consisting of 6th thru 8th grade students. Our first meet happened on November 16th at Fremont Middle School in Roseburg. Teams from northern California throughout southern Oregon gathered to compete. Each match begins with 4 teams, two red and two blue. These teams differ throughout the day so that all teams compete with and against the other. A match starts with 30 seconds of autonomous driving where the robot follows a programmed pattern using sensors to score points. After the autonomous segment, the players then drive the robot in a TeliOp 2 minute 30 second round, scoring points by moving the game pieces into different areas of the field.

Our robot was assembled from a kit of parts, and we have been improving the design performance. We will now be tackling the programming so that we can compete in the autonomous section of each match.

First Robotics is based on the concept of "Courteous Professionalism" where teams compete against and with other teams throughout the meet.

Each team also builds a portfolio of accomplishments, focusing on how they have helped other teams with problems along with their own accomplishments.

Adult coaches and mentors are there only to provide support in the "PIT" area while the team members work with the judges and other teams during the process of inspection and game play.

Eagle Exploration Days

The two days before Thanksgiving break, the high/middle school spends its days exploring different colleges and having some fun with the teachers. This year, the 7th graders went to UCC, the 8th graders went to UofO, the 9th graders to Western, 10th graders went to Rogue CC, 11th graders went to OSU, and the seniors got to choose what college they attended.

On Tuesday, the choices of activities included: hiking to 3 waterfalls, playing disc golf, tying fishing flies, making cards, playing dodgeball, and Dutch oven cooking.
