

Agenda Item

The district solicited proposals for RFP 26-001 New Servers and Storage for qualified vendors to provide proposals for new servers and storage that will replace the current system. The system will include brand new servers, a storage and disaster system, turnkey cross-connection to new and existing wiring systems, related equipment hardware and service, and any ancillary equipment necessary to create a state-of-the-art system.

On April 24, 2025, an advertisement was published in the Pioneer Doings and an invitation was sent out to twelve (12) qualified vendors. Four (4) proposals were received on May 14, 2025, from the following companies: (Dell) The REDESIGN Group, Mindsight IT, Advizex Technologies, LLC and Sentinel Technologies Inc. The district established a committee of five members that reviewed all of these submittals. The committee decided to invite all vendors back for presentations. Staff evaluated the presentations and after presentations staff continued to talk with the final highest evaluated presentations.

Staff agreed that Advizex Technologies is the most responsive proposal. Therefore, Staff recommends awarding RFP 26-001 New Servers and Storage to Advizex Technologies for an amount not to exceed \$288,618.02.
