HIV prevention education means instruction on the nature of human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS), methods of transmission, strategies to reduce the risk of HIV infection, and social and public health issues related to HIV and AIDS. (Education Code 51931)

Age appropriate refers to topics, messages, and teaching methods suitable to particular ages or age groups of children and adolescents, based on developing cognitive, emotional, and behavioral capacity typical for the age or age group. (Education Code 51931)

Medically accurate means verified or supported by research conducted in compliance with scientific methods and published in peer-reviewed journals, where appropriate, and recognized as accurate and objective by professional organizations and agencies with expertise in the relevant field, such as the federal Centers for Disease Control and Prevention, the American Public Health Association, the American Academy of Pediatrics, and the American College of Obstetricians and Gynecologists. (Education Code 51931)

Components of Sexual Health and HIV Prevention Education

In addition to complying with the criteria listed in "General Criteria for Instruction and Materials" in the accompanying Board policy, the district's comprehensive sexual health and HIV prevention education for students in grades 7-12 shall include all of the following: (Education Code 51934)

1. Information on the nature of HIV and other sexually transmitted infections and their effects on the human body
2. Information on the manner in which HIV and other sexually transmitted infections are and are not transmitted, including information on the relative risk of infection according to specific behaviors, including sexual behaviors and injection drug use

The instruction shall provide information about the value of delaying sexual activity while also providing medically accurate information on other methods of preventing HIV and other sexually transmitted infections and pregnancy.

4. Information about the effectiveness and safety of all federal Food and Drug Administration (FDA) approved methods that prevent or reduce the risk of contracting HIV and other sexually transmitted infections, including use of antiretroviral medication, consistent with the Centers for Disease Control and Prevention
