

Technology Department

McKeesport Area School District Chromebooks

McKEESPORT AREA
School District

Dear Families,

As we continue to support student learning through the use of technology, each student has been issued a Chromebook for educational use. These devices are an important tool in our instructional program, and we ask for your partnership in ensuring they are cared for properly.

Students and families are responsible for the general care of the Chromebook and for returning it in a condition similar to when it was distributed. If a Chromebook is damaged and found to be the result of student misuse or negligence, a replacement will be issued; however, the device will not be permitted to leave the building. Non-payment will result in the debt being added to the student's debt list, which must be paid off before receiving their diploma.

Estimated costs of Chromebook repairs are as follows:

Full Loss (Unrepairable): \$ 325

Power Adapter with cord: \$10

LCD Back Cover Lid: \$55

Battery: \$120

Palm rest Touchpad: \$60

Keyboard: \$60

LCD Screen: \$100

Bottom Base Cover: \$50

Web Camera Replacement: \$20

DropTech case: \$20

The district reserves the right to amend the above Replacement and Repair Costs at any time. If repair costs exceed the full replacement cost, the computer can be considered a total loss and the full replacement cost charged instead.

You can opt out of receiving a MASD Chromebook by simply returning this form signed; however, please note that our curriculum has many online components for classwork/homework requiring access to a device.

We appreciate your support in reinforcing the importance of proper care and responsible use of school-issued technology. If you have any questions, please feel free to contact the Technology Department at chromebooksupport@mckasd.net.

Sincerely,
MASD Technology Department

By signing here, you are opting out of your child receiving a MASD Chromebook. You understand that many of our curricular resources are online and your child will need alternative access to a device.
