Dyslexia Awareness

CLICK! → What is dyslexia?

- 1 in 5 people have it
- runs in families
- manipulating language is difficult
- time spent decoding words means slow processing in reading
- can present from mild to severe
- can include ADHD, dyscalculia, & dysgraphia

Dyslexia

- is real.**
Dyslexia is a real brain difference that makes reading difficult. Different brains work differently. Research has shown that dyslexia is a brain difference, not a vision problem or a lack of intelligence.
- is common.**
Dyslexia is the most common learning difference. It affects about 1 in 5 people.
- is lifelong.**
Dyslexia is a lifelong condition. It is not something you can outgrow. However, with the right support, people with dyslexia can get better at reading, writing, and spelling.

Trouble areas

- Soundings not written correctly
- Reversing or mixing up words in text
- Spelling and writing
- Reading accurately and smoothly
