

LEARN ABOUT OUR LEVY

ELECTION DAY FEBRUARY 10, 2026

Essential upkeep

This levy focuses on the basics – repairing and upgrading the buildings we already have. It keeps classrooms safe, comfortable, and ready for learning. Without it, the district will need to divert classroom dollars to fix roofs, flooring, and heating systems.

Bridging a funding gap

After voters twice rejected capital levies in 2022, projects were scaled back – but roofs and systems still age. The state doesn't fund this kind of maintenance, so local levy dollars fill the gap to preserve our community's investment in schools.

What it supports

Levy funds would go toward critical safety and infrastructure work: roofs and flooring, fire alarms and intercoms, HVAC controls, safer playgrounds and parking lots, and reliable technology and network systems.

Responsible, stable funding

This four-year proposal maintains a steady overall school tax rate – protecting taxpayers while addressing the most urgent facility needs. The district can collect only what voters approve, ensuring local dollars are used efficiently and transparently.

Different from the last levy

The recently approved EP&O levy funds **people and programs** – teachers, nurses, safety staff, counselors, and athletics. This levy funds **buildings and systems** – roofs, alarms, and safety upgrades. Both are essential to keeping schools strong and students supported.
