San José Unified School District

Hacienda Environmental Science Magnet

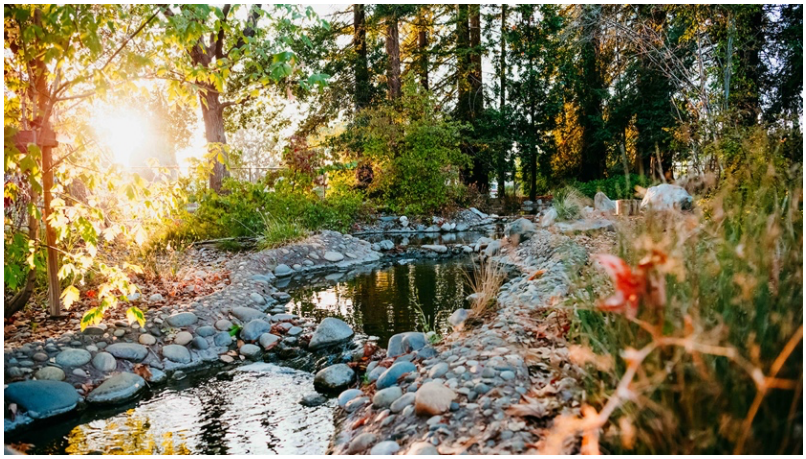

A California Distinguished School

Join us for Hacienda School Tours 2026

Hacienda is dedicated to inspiring students to explore the natural world around them. Our unique one-acre outdoor classroom features California native plants and pond ecosystems,
offering hands-on learning experiences in a natural setting.
All students receive science instruction from both a dedicated resource teacher and their classroom teachers.
Our program emphasizes academic excellence through scheduled indoor and outdoor laboratory lessons.
In addition to our strong science curriculum,
we offer a well-rounded music program that enriches the school day.

We invite San José Unified families to tour Hacienda and learn more about our innovative programs and welcoming school community. To learn more about our school, please visit https://hacienda.sjusd.org/.
