Comprehensive Needs Assessment

The security cameras on school buses need to be replaced and/or updated.

Additional training on "The Whole Child" is needed to include mental health.

School Culture and Climate Summary

Goal 5 - Modern Facilities and Safe & Secure Learning Environment

Strengths:

Providing modern facilities.... The entire school district including the 3 campuses and the Options Academy have upgraded the camera system to provide a safe and secure learning environment to all students and staff. The Intercom and bell system for TGE, Cafeteria, and Middle School Gym was replaced during the summer 2024. During the Fall semester, the intercom and bell system for the Middle School will be replaced and connected to the Cafeteria and Middle School Gym too.

Santa Maria ISD continues to provide a safe-learning environment to all students and staff by having a Police Officer in every campus (Elementary, Middle and High School). The Police Officers are present at campus events and activities as needed such as games, School events, Open House, etc... In addition, SMISD will further provide security by hiring a security company that provides two additional armed security guards. The security guards are stationed at the entrance gate of TGE elementary and assist with monitoring during lunch periods.

Hall Pass program is utilized district wide to monitor visitors and part-time employees (contractors) in order to make sure that every visitor has clearance to be on campus grounds. Each visitor is mandated to wear a visitor's badge upon campus or district approval.

Each campus front door is locked and secure at all times. Campus Officers are stationed at the front door for added security. Any student, staff member, or visitor must clear the metal detectors upon the one-point entry into the campuses.

An MOU was initiated with "I Love You Foundation" to document the emergency system used for threats such as Fire/Hazards, Secure, Lockdown, Hold, Evacuate, and Shelter under the Standard Response Protocol.

An MOU was initiated with the City of La Feria as a reunification plan at the Safety Dome In La Feria in case of evacuation of the School District.

SMISD also utilizes the software system Securly which notifies campus administrators of flags such as: self-harm, sexual & physical abuse, bullying, bomb threats or violent behavior, and any inappropriate behavior.

Fencing has been installed to secure the perimeter of all campuses. During the Summer of 2024, the fence on the south side was installed. Motorized gates through Cellgate and identification kiosk provide additional security through secure access or denial. Each staff member was issued an RDF card that is assigned to their campus and is timestamped with photo access.

The district invested in additional security by rekeying every classroom and exterior doors and included installation of Night Lock devices for each classroom. Outside law enforcement took a tour of campuses and buildings to familiarize themselves with SMISD. Additional information was provided in the Emergency Operations Plan with the assistance of the Safety and Security Committee members.

Technology

Technology Strengths

Goal 3: Technology

- Providing filtered high speed internet services to students, staff and visitors district wide.
- Every core content area classroom contains a media system comprised of: Newline Q-Series 4K UHD interactive multi-touch LED display or a high lumen LCD projector (wall or ceiling mount), document camera/visualizer, and high speed workgroup.
- District users are provided with web based enterprise level Gmail and Google Apps accounts with real time collaboration and document sharing through the use of Google Drive.
- Public information infrastructure include: Family access (provides parent access to student grades, attendance, etc.), school to parent messaging with the use of Blackboard Online Communication Services system for emergency and relevant information (phone call, text and email), district website, social media (Facebook).
- Purchase additional school owned devices (Chromebooks) to provide more classrooms technology rich content and learning opportunities.
- Purchased additional Cisco managed access points to support bandwidth for additional devices (school owned and BYOD).
- Provide teachers/students resources for online textbooks and books to address literacy concerns (MyOn and MackinVIA).
- Promote the use of e-learning, mobile technologies, and collaboration through Google Classroom.

Comprehensive Needs Assessment

Technology Needs

- SMISD needs to provide continuous technology integration, professional development, and support in all software programs adopted by the district.
- Technology Equipment for Network Infrastructure should be repaired as needed, maintained yearly, and replaced as needed.
- End user devices should be replaced every 4-6 years.
- SMISD needs to add additional fiber to the Agriculture Building and 5th grade wing in or to maintain a fiber wide area network (WAN).
- The Options Campus requires additional Cisco managed access points to support bandwidth for additional services.

Technology Summary

Education, like many other fields, is rapidly transformed by new technologies. Smart personal devices, easy to navigate databases and ubiquitous connectivity are just a few of the relentless forces redefining the classroom and reshaping how students learn. The Texas Education Agency set forth the Technology Applications TEKS, a set of skills and guidelines, to assist schools in creating curriculum requirements for every course. Santa Maria ISD has established four core goals to support the campuses:

1. Provide technology-based solutions which promote and support the instructional needs of teachers and the learning needs of students.
2. Provide technology-based professional development for staff to enhance and increase effective use of technology tools.
3. Provide technology-based solutions and support to promote effective administrative use.
4. Establish and maintain a technology infrastructure that promotes communication and learning for students, staff and the community.

To meet the above goals, each PK-12 core content classroom is equipped with a Newline Q-Series 4K UHD interactive multi-touch LED display or LCD projector, a high resolution visualizer (document camera), camera, and high speed access to the Internet. All campuses are equipped with Chromebook carts and are at a 1:1 student ratio.

As part of its commitment for enhancement of student and staff achievement, a technology plan is maintained and updated yearly. An annual review ensures an accurate analysis of district needs. Components of this review include:

1. Comprehensive online (technology related) instructional needs assessment for teachers (also based on Campus Improvement Plan feedback).
2. A yearly equipment inventory.
