SULLIVAN
MIDDLE SCHOOL

6TH GRADE

Math: In math 6 we are working on properties of numbers, greatest common factor and least common multiple. Check in with your student to see how they did on their test. Students have homework every night except Friday. They should work on it for 20 minutes a night. Fractions up next.	**Science:** In science the sixth graders started off learning about volcanoes. To understand volcanoes we have been working to understand concepts like tectonic plates, types of rocks, and the layers of the Earth. Ask your student how these ideas work together to create volcanoes. Fossils coming up next!
ELA: In 6th grade ELA, we are reading Look Both Ways by Jason Reynolds, and we are practicing identifying the author's point or main idea in each chapter. Students are completing notebook assignments and worksheets for each chapter of the book!	**History:** Reach out to Mr. Morris at mychal.morris@mpls.k12.mn.us with questions regarding history.
Specialists: Ask your child how their specialist classes are going. Sixth grade students currently have Band, STEM, Gym, and/or Art.	

Calendar Events: Picture Day: Friday, October 24th
NO School: Tuesday, November 4 and
Wednesday, November 26 - Friday, November 28
