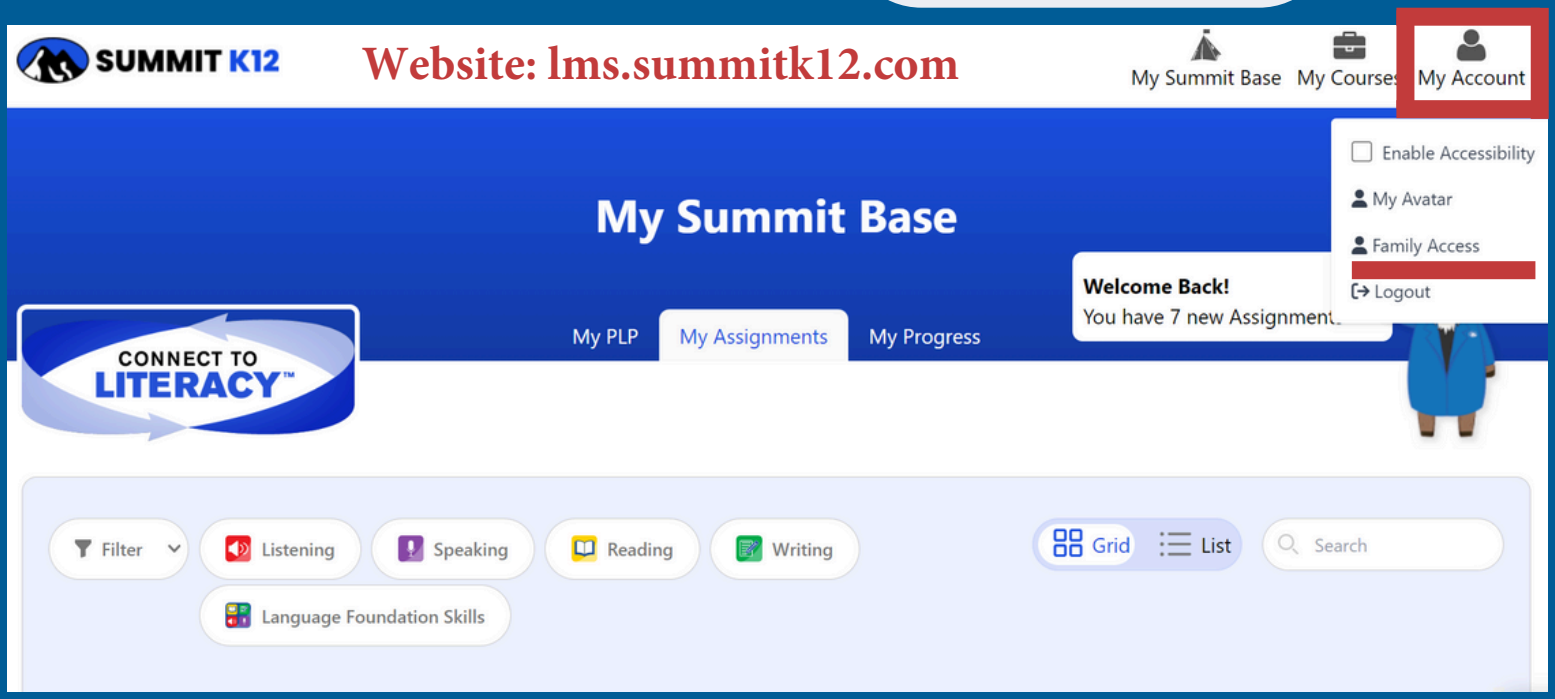
Family Access

First-Log in to your student's account

Click on "My Account" and "Family Access" from the dropdown



4 unique usernames will generate along with a password

Family user ID	Password	Change Password

- The system auto-generates 4 family user IDs based on the student's user ID
- A password is auto-generated to create 8-digit passwords
- The passwords can be changed (through the student's account) using the "Edit" button
- The "Family Access" role is similar to a student's role, but does not require a teacher to assign activities
