1. Here is the difference between program model placement in DCSD:

DCSD's special programs should be offered in a few schools across the district

- Specific stand-alone facilities would be designated to house special programs, with those facilities being distributed throughout the district.
- Each of these buildings may house multiple programs
- Special programs will only be housed in non-neighborhood schools

DCSD's special programs should be offered in neighborhood schools

- A program within a school model means that a specialized program (like STEM, Montessori, dual language, or arts) is offered inside a regular neighborhood school
- Special programs will only be housed in neighborhood schools

How well do you understand these options?

2. The committee overwhelmingly shared that they would like to begin reimagining with **programs embedded in neighborhood schools**. To ensure that we have heard the majority of voices, please complete the fist to five based on this direction.

Do you agree that DCSD's special programs should be offered in neighborhood schools?
