Have a Great Summer!

DeltaMath Offer

Student Benefit Provided by the Math Department

By Mr. Matos

Fight Summer Learning Loss and/or Get Ahead for next year with *DeltaMath*!

DeltaMath is an online platform used by many math teachers at Diman Regional. This summer, parents and guardians can help support students and **prevent summer learning loss** by using the link below to get started with *DeltaMath* for Home for **1 month free!** Students will gain access to personalized problem sets, fun math games, and our **NEW "Prep Courses"** to start next school year on a high note!

Transform your math experience with a personalized learning platform designed for at-home success. Catch up, get ahead, or build confidence – accelerate your progress wherever you are.

Please be certain to cancel your subscription in accordance with *DeltaMath's* policies to avoid charges beyond the 1-month free trial period. Diman Regional is not affiliated with *DeltaMath* and participation in this offer is voluntary.

Upcoming PW Settings Change

Password Update:

One of many projects IT will be completing is a change to our password settings and how they are managed. The previous method of managing passwords through resets inside the building has been depreciated and we will move to managing passwords directly through Google. What this means for users is that you will be required to reset your Google account password prior to next school year.

By **August 15th** all Faculty will be prompted to reset their Diman Regional Google Account Password. Following the National Institute of Standards and Technology (NIST) recommendations for K-12 Passwords users will not be able to reuse a password they had previously. New passwords will need to be between 8 - 100 characters.

Password Details

Moving Forward, users will be required to change their password at the start of each school year.

Passwords through the Ages

- **New guidance recommends AGAINST complex passwords**
 - Passphrases comprised of 12+ characters are now recommended
- **Users have used sentences or combinations of three unrelated words as potential passwords**

Centralizing Password Management

- **Centralization**
 - This change will allow Diman to leverage the security of Google with password management.
- **Passwords can be changed online via your Google account moving forward - No more need to be inside the building!**

But Wait, There's More!

- **Multifactor Authentication**
 - In addition to leveraging security we are also able to use Google's Multifactor Authentication to further secure our apps and logins
- **Helps move us towards "Single Sign On" - Users use one sign in to access all apps!**

Any questions on Password resets or problems after the August 15th Update please reach out to helpdesk@dimanregional.org

Faculty Device Turn In

All Faculty Requested to Turn in District Devices

Summer Server Migration!

Servers running Diman's Network Environment will be completely rebuilt and upgraded this summer. This process involves touching every device, as it is required to be updated and physically connected to our new server system.

- **We ask all Faculty to make arrangements to drop devices off prior to end of day on June 18th:**
 - Please bring devices by the Library at your convenience
 - Touch base with a member of the technology Department, who will sign off that your device has been received.

**ONE WAY TO KEEP YOUR
LAPTOP COOL...**

*Have a great
Summer!*
