Shawnee Mission School District
RFP 25-011 – Wide Area Network Connectivity
October 29, 2025

Addendum No. 1

The following response addresses question(s) submitted by vendor(s) on October 28, 2025; responses to the question(s) are indicated in **bold**. If you feel that a question has not been addressed, please contact Reed Beebe at purchasing@smsd.org as soon as possible.

1. To ensure our proposal fully aligns with the specified requirements, we kindly request the opportunity to coordinate a site survey with the District's technology team. This will help us accurately assess the in-building construction scope, hardware needs, and preferred routing from the MDF to public right-of-way. Alternatively, if a site survey cannot be accommodated, a building footprint referencing the MDF location, and if known, the preferred/existing network path from the MDF room to the outside of the building, extending to the right-of-way would be extremely beneficial. Please let us know at your earlier convenience if either option can be arranged.

   Due to the size of the District and current school schedules, it is challenging for the District to accommodate site surveys by interested WAN service vendors. However, the District has prepared schematic JPG file images of District locations, with the headend/MDF indicated by a red star. Interested WAN service vendors may request a Google Drive link to these images by emailing purchasing@smsd.org.

   Please note that these JPG files will be shared only for the purpose of assisting vendors with the preparation of a response to this RFP, and should be treated as confidential and proprietary to the District. These JPG files should not be used for any other purpose than the preparation of a response to the RFP, nor shared with any third party without the District's written permission.
