

Annual Notification Of Asbestos Management Plans

The Environmental Protection Agency, as part of its regulation of asbestos in schools, asks that districts notify parents, communities, teachers, and employee groups that an Asbestos Management Plan has been developed. The Mason County schools have developed a management plan for each of its facilities. These plans record location of asbestos, surveillance, inspections, training for maintenance and custodial staff, and summaries of asbestos abatement activities. Each site's Asbestos Management Plan has been filed with the Superintendent of Public Instruction and is available at each school's administrative office.

Shelton School District No. 309

Robert Herron
