

Broward County Public Schools is Empowering Learning Through Innovation

The classroom of the future is here now, and Broward County Public Schools (BCPS) is leading the way in educational innovation, reshaping the classroom experience for students and educators. By integrating cutting-edge technologies and personalized learning strategies, BCPS is ensuring students are equipped not only for academic success but also for the evolving workforce needs of the future.

We are well into the implementation of transformative initiatives designed to enhance student engagement and modernize learning environments. These include the Districtwide adoption of Microsoft 365 Copilot, and the integration of extended reality (XR) technologies – which include virtual reality (VR), augmented reality (AR) and mixed reality (MR). These innovations are not just about technology – they're about empowering learners and supporting educators.

Transforming Classrooms through Innovation

- **Microsoft 365 Copilot AI Platform**

BCPS is the first school district in the world to implement a full-scale rollout of this powerful artificial intelligence (AI) assistant. Through this partnership, teachers can plan lessons, create rubrics and manage tasks more efficiently – freeing up valuable time to focus on personalized learning and student connections.

- **Bringing Learning to Life through Virtual Reality (VR)**

The District has launched Prisms VR in all middle schools and other select schools, allowing students to explore math and science through immersive and interactive simulations. With VR, students can experience complex concepts in a hands-on way, making learning more exciting and easier to understand.

- **AI-Powered Personalization**

In addition to Copilot, we are leveraging complementary AI tools to tailor instruction to each student's needs. These tools provide support in multiple languages and adjust lessons based on how each student learns best. This helps close learning gaps and ensures all students have the opportunity to succeed.

Broward County Public Schools is not just embracing innovation – it is setting a new standard for what modern education looks like. These efforts reflect our commitment to equity, excellence and empowerment for every student and educator. As technology continues to evolve, BCPS remains steadfast in its mission to lead with purpose, ensuring innovation serves as a bridge to opportunity, creativity and lifelong success.
