

# PREVENTIVE MEDICATION PROGRAM

## Diabetes Supplies

Your plan's Preventive Medication Program includes diabetes-related supplies. Preventive medications/supplies are used to prevent certain conditions from developing, or to prevent a condition from coming back.

### About this list

This is a list of the most commonly prescribed diabetes-related supplies that are part of Cigna's preventive program as of July 1, 2023.<sup>1,2</sup>

#### Here's some helpful information about this list:

- › Supplies are listed alphabetically.
- › Generic supplies are listed in all lowercase letters and brand-name supplies are listed in all capital letters. Most brand-name supplies that have a generic equivalent are no longer part of Cigna's preventive medication program.
- › **This list doesn't include preventive products that are covered at 100%, or no cost-share (\$0) to you, under the Patient Protection and Affordable Care Act (PPACA)'s preventive services coverage requirement.**
- › **This list is updated often so it isn't a complete list of supplies.** Also, your specific plan's preventive medication program may not include all of these supplies.

Log in to the **myCigna**® App<sup>3</sup> or **myCigna.com**®, or check your plan materials, to see all of the products included in your plan's preventive medication program.

### Your cost-share for preventive generic and preferred brand diabetes-related supplies

Not all plans offer the same cost-share for their preventive medication program. For example, some plans may require you to pay a copay, coinsurance and/or deductible for preventive generic and preferred brand supplies; other plans may not.

Log into the **myCigna** App or **myCigna.com** and use the Price a Medication tool to see how much your diabetes-related supplies cost.<sup>4</sup>

#### Go generic and save

Ask your doctor if preventive generic diabetes-related supplies may be right for you. Generics often cost much less – in some cases, up to 85% less.<sup>5</sup>

1. If you're taking a medication that will be covered differently as of July 1<sup>st</sup>, you may not be affected by the change(s) at that time. That's because there are state laws in **Connecticut, Louisiana, New York** and **Texas** that may require your plan to continue covering your medication as it is now, until your new plan year starts. For example, if Cigna is making a change to a medication on your drug list on July 1<sup>st</sup> but your new plan year doesn't start until November 1<sup>st</sup>, the change(s) won't affect you until November 1<sup>st</sup>. It's up to you to remember that your coverage will change at that time. To find out if these state laws apply to your plan, please call Customer Service using the number on your Cigna ID card.
2. State law in **Illinois** may require your plan to cover your medications at your current benefit level until your plan renews. This means that if you currently have approval through a review process for your plan to cover your medication, the drug list change(s) listed here may not affect you until your plan renewal date. If you don't currently have approval through a coverage review process, you may continue to receive coverage at your current benefit level if your doctor requests it. To find out if this state law applies to your plan, please call Customer Service using the number on your Cigna ID card.
3. App/online store terms and mobile phone carrier/data charges apply. Customers under age 13 (and/or their parent/guardian) will not be able to register at **myCigna.com**.
4. Prices shown on **myCigna** are not guaranteed and coverage is subject to your plan terms and conditions. Visit **myCigna** for more information.

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.
