

Explore Your Passion with AP Capstone[™]

THE AP CAPSTONE DIPLOMA PROGRAM LETS YOU:

Study topics of your own choosing, in depth.

Master key skills you'll use in college and career.

Stand out in your college applications and interviews.

What Is the AP Capstone Diploma Program?

AP Capstone™ is a diploma program based on two AP courses: **AP Seminar** and **AP Research**. These yearlong courses focus on developing the critical thinking, research, collaboration, time management, and presentation skills you need for college-level work.

AP Seminar

In this course, you'll learn to consider an issue from multiple perspectives, identify credible sources, evaluate strengths and weaknesses of arguments, and make logical, evidence-based recommendations. You'll investigate a variety of topics through various viewpoints of your choice.

During the course, you'll complete a team project and an individual paper and presentation, as well as take a written end-of-course exam. These components contribute to the overall AP Seminar score.

AP Seminar is a prerequisite for AP Research.

AP Research

In AP Research, you'll explore various research methods and complete an independent research project. Your project can build on a topic, problem, or issue you covered in AP Seminar or on a brand-new topic of your own choosing.

At the end of the project, you'll submit your academic paper and present and defend your research findings. These components contribute to the overall AP Research score. There is no end-of-course exam.

Here are some topics that students have chosen to investigate in **AP Seminar**:

- Effect of texting on grammar skills
- Food waste solutions
- Future of the automotive industry
- Importance of voting age and civic participation of teens
- Mathematics behind extreme sports
- Genetically modified organisms
- Role of art in education
- Wealth inequality

Here are some topics that students have chosen to investigate in **AP Research**:

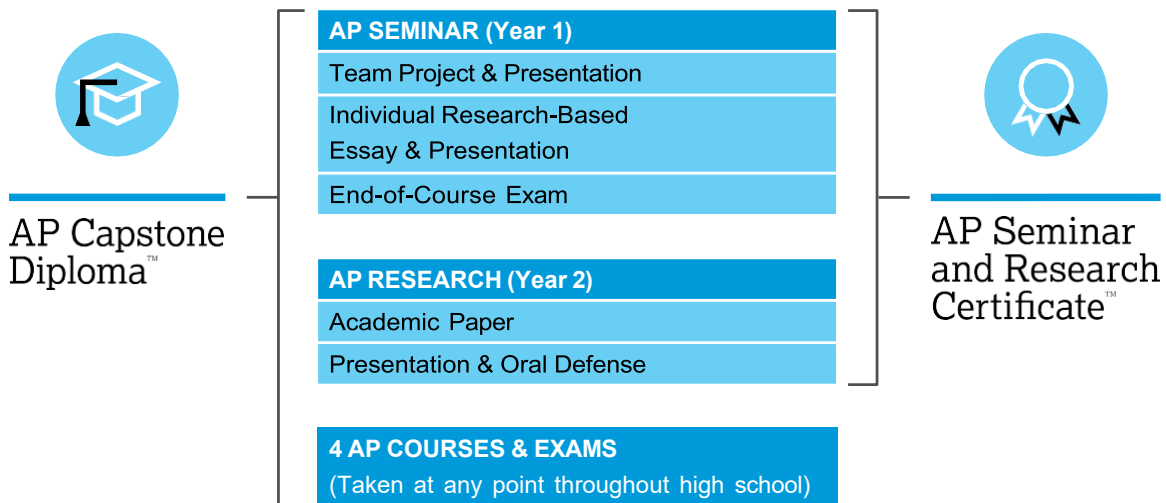

- 3-D printed prosthetics for amputees
- Algorithm of K-POP music
- Effects of sleep deprivation on academic achievement in teens
- Learning chemistry through musical chords
- Environmental injustice in subsidized housing
- Effect of popular opinion on the implementation of Supreme Court decisions
