ABOUT ANTILLES SCHOOL

Along with providing a rigorous curriculum that prepares students for acceptance to the nation's top universities, we also help shape their physical, emotional, and intellectual well-being. All courses are focused on core college preparatory material and skills but also allow students to engage at an age-appropriate pace and in greater depth. Small class sizes provide an individual student-teacher connection while also enhancing student interaction. We challenge our learners to collaborate, to lead, to share decision-making, and to be mindful of the environment around them.

Our school is situated on 27 acres on St. Thomas' south side, and our modern facilities include a theater, libraries, gymnasium, and laboratories which offer our students the time for deeper learning and provide a competitive edge upon acceptance to four-year colleges and universities. With close proximity to beaches, nature preserves, and historical landmarks, students are able to take advantage of off-campus learning opportunities under the water, in lush tropical forests, up mountain peaks, and across rich agricultural farm grounds.
