

1. Turn on the device. Press and hold the **Power button** for 3 seconds then release, 'MiFi' then appears on the display.

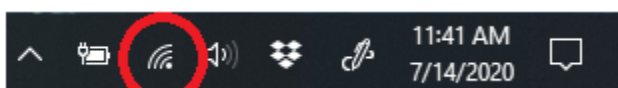

2. Tap on Wi-Fi Name/Password to identify your devices network name and password.

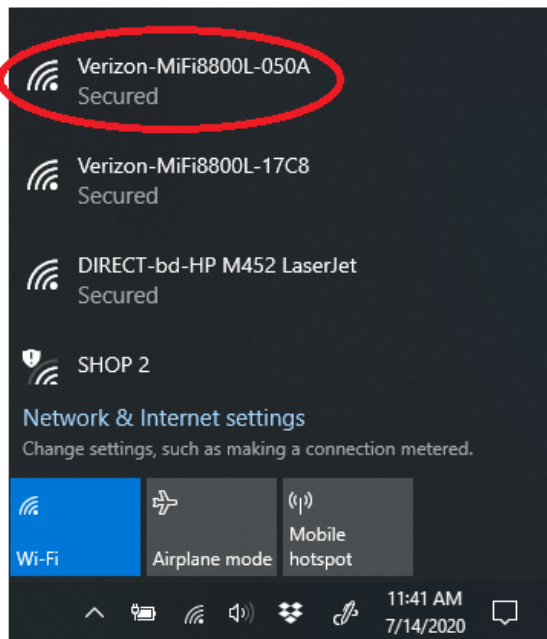

3. The exact wireless name and password will vary by device, but an example is below.

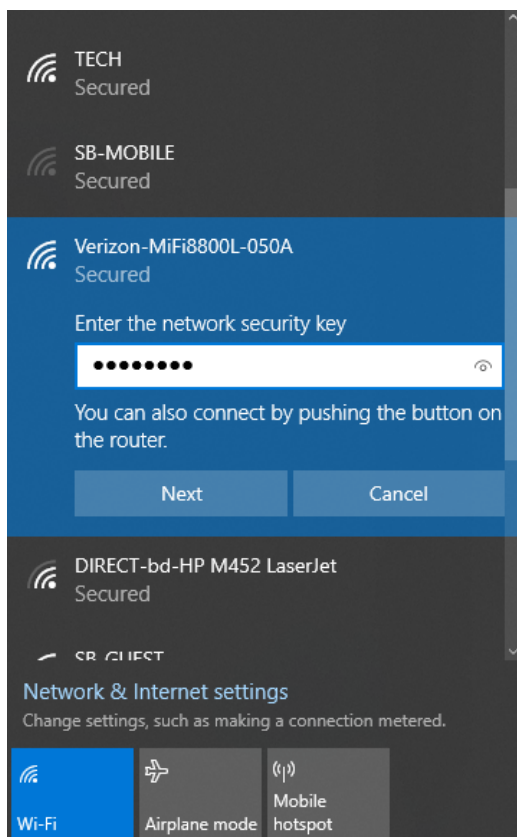

4. Once you have determined the name and password go to your windows device and click the wireless icon in the bottom right of the screen.

5. After clicking on the icon, find your matching wireless name and click on it.

6. Enter your password from step 3 into the password box that appears after clicking on the network name.

You should now be connected and able to browse.
