5th Grade Newsletter - November

Unit 2 - Essential Question: How can we create an inclusive and accessible playground for our youngest students at Sullivan?

We are starting off Unit 2 by visiting and investigating the Sullivan Tot Lot and Playground. Then we will learn about force and motion to help us understand how playgrounds work. Finally we will examine different sources about inclusive design and create surveys for the Sullivan Hi 5, ECSE, and Kindergarten students and their teachers. Students will then design and propose models of the Tot Lot that are inclusive, appealing, and contain 5 different sensory elements. Groups will end the unit by writing an informative text about their Tot Lot design and present their designs in an exhibition.

Unit 2 & Unit 3- Adding and Subtracting Fractions and Decimals
