
November Number Corner

In November, we will compare and categorize triangles. We will also collect a meter a day, and observe how the meter, centimeters, decimeters, decameters and kilometers increase as we add each unit.

5th Grade Band & Strings!

During the first quarter in band and strings, students explored different instruments and collaborated with me to choose the instrument they will learn to play this year. Students have a school instrument and are currently working on learning their first songs! Every student has a small group lesson once per week on Tuesdays, Wednesdays or Thursdays. You can visit the Band & Strings Website to see what we're working on!

<https://sites.google.com/mppls.k12.mn.us/sullivan-instruments/>

I highly encourage students to practice outside of school. Your student can bring their instrument home if they turn in the instrument agreement. All families, please complete the Instrument Agreement form together:

<https://docs.google.com/document/d/1yv9CneQcTMSZHLLLeVUEV4dJPKiNVu/view>

I'm excited to make music together! Please email me if you have any questions about your student's progress or about their instrument: michelle.hofeldt@mppls.k12.mn.us

Talking Points

We will be using this app more to connect with families.

If you can download the Talking Points for Families app, the messaging will be easy to see between your children's classrooms.

You may select the language you want to read your messages, and can send a message at any time, as well as receive class announcements and direct messages.
