Education Consultant

## **MATH RECHARGED: JUMPSTART 2026 WITH HIGH-IMPACT STUDENT ENGAGEMENT STRATEGIES**

Reenergize your K–8 math classroom for the new year! This interactive session will explore high-impact instructional strategies that spark curiosity, increase student participation, and deepen mathematical thinking. Drawing from her own classroom experiences with the *Building Thinking Classrooms* framework, Annette will model strategies that sustain the flow of a Thinking Classroom, where the focus is on learning as a *process*, not a product. Participants will leave with ready-to-use ideas to recharge their instruction and reignite their students' excitement for math in 2026!
