

Appendix A

Occupational Exposure to Hazardous Chemicals in Laboratories Compliance Checklist

The following checklist serves as a guide reference for St. Cloud School District to evaluate their level of compliance with the OSHA Occupational Exposure to Hazardous Chemicals in Laboratories Standard (29 CFR 1910.1450).

- Identify hazardous laboratory-use chemicals presents
- Written chemical hygiene plan.
- Designate chemical hygiene officer.
- Evaluate employee exposure levels.
- Establish medical surveillance program.
- Develop good laboratory practices and standard operating procedures.
- Establish control measures.
- Develop a storage program.
- Develop a disposal program.
- Develop emergency response plan.
- Train employees.
- Maintain records.
- Complete Fire Marshal Safety Checklist

Note: *This checklist is not intended to be comprehensive in nature. Schools should refer to their Chemical Hygiene Plan which outlines additional compliance requirements.*
