

**SUBJECT: STUDENT USE OF COMPUTERIZED INFORMATION RESOURCES  
(ACCEPTABLE USE POLICY)**

The Board of Education will provide access to various computerized information resources through the District's computer system ("DCS" hereafter), consisting of software, hardware, computer networks, and electronic communications systems. This may include access to electronic mail, so-called "online services" and the "Internet." It may include the opportunity for all students to have independent access to the DCS from their home or other remote locations. All use of the DCS, including independent use off school premises, shall be subject to this policy and accompanying regulations. Further, all such use must be in support of education and/or research and consistent with the goals and purposes of the School District.

**Access to Inappropriate Content/Material and Use of Personal Technology or Electronic Devices**

This policy is intended to establish general guidelines for the acceptable student use of the DCS and also to give students and parents/guardians notice that student use of the DCS will provide student access to external computer networks not controlled by the School District. The District cannot screen or review all of the available content or materials on these external computer networks. Thus, some of the available content or materials on these external networks may be deemed unsuitable for student use or access by parents/guardians.

Despite the existence of District policy, regulations, and guidelines, it is virtually impossible to completely prevent access to content or material that may be considered inappropriate for students. Students may have the ability to access such content or material from their home, other locations off school premises, and/or with a student's own personal technology or electronic device on school grounds or at school events. Parents and guardians must be willing to establish boundaries and standards for the appropriate and acceptable use of technology and communicate these boundaries and standards to their children. The appropriate/acceptable use standards outlined in this policy apply to student use of technology via the DCS or any other electronic media or communications, including by means of a student's own personal technology or electronic device on school grounds or at school events.

**Standards of Acceptable Use**

Generally, the same standards of acceptable student conduct that apply to any school activity shall apply to the use of the DCS. This policy does not attempt to articulate all required and/or acceptable uses of the DCS; nor is it the intention of this policy to define all inappropriate usage. Administrative regulations will further define general guidelines of appropriate student conduct and use, as well as proscribed behavior.

District students shall also adhere to the laws, policies, and rules governing computers including, but not limited to, copyright laws, rights of software publishers, license agreements, and student rights of privacy created by federal and state law.

Students who engage in unacceptable use may lose access to the DCS in accordance with applicable due process procedures, and may be subject to further discipline under the District's school conduct and discipline policy and the Student Discipline Code of Conduct. The District reserves the right to pursue legal action against a student who willfully, maliciously or unlawfully damages or destroys property of the District. Further, the District may bring suit in civil court against the parents/guardians of any student who willfully, maliciously or unlawfully damages or destroys District property pursuant to General Obligations Law Section 3-112.

(Continued)

**SUBJECT: STUDENT USE OF COMPUTERIZED INFORMATION RESOURCES  
(ACCEPTABLE USE POLICY) (Cont'd)**

Student data files and other electronic storage areas will be treated like school lockers. This means that such areas shall be considered to be School District property subject to control and inspection. The computer coordinator may access all such files and communications to ensure system integrity and that users are complying with the requirements of this policy and accompanying regulations. Students should **NOT** expect that information stored on the DCS will be private.

Students are strictly prohibited from sharing or disclosing any sensitive information when using district-owned technology. Sensitive information includes, but is not limited to, passwords, personal addresses, phone numbers, grades, health records, and any other private data belonging to themselves, other students, staff, or the district. Sharing such information through email, messaging, social media, or other online platforms places individuals and the district at risk of harm, including identity theft, harassment, and unauthorized access to school systems. Any violation of this policy will be treated as a serious breach of trust and may result in disciplinary action, loss of technology privileges, and/or further consequences as outlined in the district's Code of Conduct.

## Notification

The District's Acceptable Use Policy and Regulations will be disseminated to parents and students in order to provide notice of the school's requirements, expectations, and students' obligations when accessing the DCS.

Regulations will be established as necessary to implement the terms of this policy.

NOTE: Refer also to Policy #8271 -- Internet Safety/ Internet Content Filtering Policy District Code of Conduct on School Property
