
Wellness Center Health Policies - Asociación Escuelas Lincoln

Student Health Information

The Wellness Center will keep an updated file of the annual health records of all students, these annual health records must be turned in at the beginning of every school year having been completed and signed in the months of June, July, or August. Parents will be responsible for informing the nurses of any changes that may arise in the year related to their children.

Vaccination Guidelines:

A.E.L adheres to the immunization schedule required by the Argentine Ministry of Public Health and the recommendations of the CDC (Center for Disease Control).

Students will be expected to have the following vaccines:

- ✓ Diphtheria, Tetanus, and Pertussis (DTAP): 4 doses by 6 age
- ✓ Diphtheria, Tetanus, and Pertussis (DTAP): booster at age 12
- ✓ Measles Mumps and Rubella (MMR): 2 doses by age 6
- ✓ Polio: 4 doses by age 6
- ✓ Hepatitis B: 3 doses

The following vaccines are also recommended:

- Influenza vaccine annually
- Varicella (Chicken Pox): 2 doses preferably
- Hepatitis A: 2 doses preferably
- Pneumococcal (PCV): 3 doses
- Meningococcal (MCV): 3 doses
- Human Papillomavirus (HPV): 3 doses between ages 11 – 18
- Coronavirus: 2 doses preferably

In case you decide not to apply one or several vaccines to your child(ren), a signed copy of the **Refusal Vaccination Form** must be submitted. This form states that you assume the existing risk that your child(ren) can suffer a vaccine preventable disease and endanger the health of others.

Notifiable Diseases

The municipality of Vicente Lopez requires certain diseases to be notified. The school has the responsibility by law to do so. Thus, parents/guardians and teaching/non-teaching staff must notify the nurses if they detect any case, so they can carry out the corresponding notification and alert process. The diseases to be notified are the following:

Patologías de Notificación Obligatoria
Dirección de Epidemiología - Secretaría de Salud
MVL

- Bronquiolitis en < 2 años
- Brucelosis
- Chagas
- Diarrea aguda
- Enfermedad tipo influenza o síndrome gripal
- Hepatitis
- Infección por HPV/Clamidia/Herpes
- Lepra
- Neumonía
- Parotiditis
- Poliomiелitis
- 6ta enfermedad
- VIH/SIDA
- Sífilis
- Supuración genital gonocócica
- Toxoplasmosis
- Tuberculosis
- Varicela
- Intoxicaciones (*alimentaria, tóxicos, drogas, etc.*)
- COVID-19
- Dengue
- Zika/Chikungunya
- Meningitis
- Sarampión/Rubeola (*erupción y fiebre*)

Enfermedades de Notificación Obligatoria Ley de Vigilancia Epidemiológica n° 15.465	
Sospechoso Notificación Inmediata	Notificación Semanal
• Brotes de cualquier etiología • Coqueluche • Encefalitis • Meningoencefalitis • Exantema Febril: (Sarampión/Rubeola) • Rubeola Congénita • Hepatitis A • Diarreas Agudas Sanguinolentas • Síndrome Urémico Hemolítico (SUH) • Psitacosis • Parálisis Fláccida Aguda en < 15 años (PAF) • Síndrome Febril (Paludismo, Dengue, Chicungunya, Fiebre amarilla, Hemorrágica Argentina, Leptospirosis, Hantavirus, Rickettsiosis, Virus del Nilo, Encef. de San Luis, Fiebre Recurrente, Tifoidea y Paratifoidea, otros) • Sínd. Resp. Agudo Severo (SARS) • IRAG • Fallecido por IRAG • Botulismo/Botulismo del lactante. • Intoxicaciones alimentarias • Intoxicaciones químicas (plaguicidas, pesticidas, monóxido de carbono) • Intoxicación por moluscos • Toxo-intoxicación Alimentaria • Triquinosis • Tétanos • Tifus epidémico • Paludismo • Peste • Rabia Animal- Humana • Viruela • Carbunco cutáneo-extracutáneos • Cólera • Aracnoidismo • Escorpionismo • Ofidismo	• Accidentes del hogar • Accidentes laborales • Accidentes viales • Accidentes sin especificar • Bronquiolitis • Diarreas • Neumonía • ETI (Enfermedad tipo influenza) • Varicela • Parotiditis • Sexta enfermedad • HPV / Chlamydia/ Herpes Virus • Sífilis Primaria- Secundaria y Congénita • Supuración Genital Gonocócica • Hepatitis B/C/D/E, sin especificar • Síndrome Febril inespecífico • Tuberculosis • Intoxicación medicamentosa • Hidatidosis • Lepra • Poliomieltitis • Toxoplasmosis • Leishmaniasis cutánea, Mucosa o visceral • Brucelosis • Chagas Congénito • Chagas agudo • VIH/SIDA

Student Assessment

A student must have the authorization of a school staff member to visit the Wellness Center. Students may come to the Wellness Center without a pass during a medical emergency or serious accident.

The parent/guardian will be contacted if necessary by phone, email, or WhatsApp according to the [Wellness Center parent communication guidelines](#). If a student must leave the A.E.L. campus due to health reasons during the school day, the parent/guardian permission and transportation to leave school will be required.

Emergencies

The school has a protected area service and a private ambulance service for emergency situations. In these cases, the parent/guardian or the emergency contact will be notified.

Fever

If a student has an axillary temperature equal to 37.5 °C (100.0 °F) or higher, they

must stay at home. **The student must be 24 hours without fever (without the influence of an antipyretic) before returning to school.**

Pink eye (Conjunctivitis)

If a student has conjunctivitis or any other eye-related infection, a certificate from an **ophthalmologist** must be submitted. This certificate must state that **after having completed the corresponding treatment, the student is cleared to return to school and does not represent a potential risk of infection among the rest of the students.**

Lice & Fungus

The school is committed to being pediculosis and fungus-free environment. For this purpose, periodic reviews will be carried out. If active lice and/or eggs or fungus are found, parents will be notified via email. We encourage parents/guardians to regularly check for lice/fungal infection at home and **notify the school nurses if lice or a fungal infection is found** so we can perform the corresponding follow-up at school. For more information, please see our [lice and fungal infection control guidelines](#).

Medication

Diagnosis and treatment of diseases, as well as the prescription of medication, are the responsibility of physicians. The Argentinian law prohibits registered nurses from administering any kind of medication, including “over-the-counter” ones, without a written prescription, signed and stamped by a physician and a parent/guardian permission, except in emergency situations.

The prescription must include the following information:

- Student's name
- Diagnosis
- Name of the drug
- Dose
- Date
- Doctor's signature and seal

When the administration of medication is necessary during school hours, the guidelines are:

> For minor discomforts, such as headaches, fever, earaches, stomachaches, muscle aches, and menstrual cramps, medications are available and will be administered to students only with parent /guardian permission.

> For special conditions or illnesses (chronic or acute), which require medication on a regular basis, a written order from the physician should be presented, the parent/guardian should fill out the Parent Permission Slip available at the Wellness Center, and provide the medication. The medication must be in its original container and administered at home at least once before being administered at school to avoid unexpected reactions. It must be delivered by hand to the nurses by a parent or responsible adult.

Students should not have medication with them during school hours. All medication needed will be stored at the Wellness Center to be used when necessary.

If your child takes a prescription medication at home outside of school hours, and the administration of the medication is changed by a physician (change of dose, medication, or frequency) or another medication is added, a parent or guardian must inform the Wellness Center to maintain the student's health information updated.

Records

- The nurses keep a written record of all students and community members who visit the Wellness Center daily. This includes the date, time, full name, reason for the visit, intervention of the nurse, and follow-up.
- The Wellness Center keeps a file for each A.E.L student which includes all the health forms, medical certificates, and vaccination records submitted and will be kept for future reference.

These documents will be retained for a period of 10 years.

School Absences

All health-related school absences must be reported to the school nurse on the **first day of absence**. If a student is absent for more than 2 consecutive school days, a medical certificate will be required stating that the student is in good health to return to school or a medical certificate that states the amount of days needed for rest. If a student suffers from an infectious-contagious disease that may place other students at risk of contagion, parents should notify this to the Wellness Center.

For more information, please check our [illness guidelines](#).

Communication about Health Matters

Health information regarding the A.E.L. community will be communicated through The Flying Condor, email.
