

Emergency Medical Technicians (EMTs)

This course provides the student with the knowledge and skills for the emergency medical field, responsibilities, first aid measures and use of emergency equipment.

Why choose a career as an EMT?

- High demand for EMTs
- Competitive entry level salary
- Ample advancement opportunities
- Training could be utilized in areas such as hospitals, fire departments, industrial plants and clinics

Firefighter Program

Our newest pathway is designed to introduce our students to the skills and knowledge required for a career in firefighting and emergency services.

Interested in public safety?

This program prepares students to potentially enter the workforce directly after high school or pursue further certifications in firefighting or emergency medical services (EMS).

Where Success Is Prescribed

The mission of the C.A. Johnson High School Magnet is to prepare students for post-secondary education and provide them with opportunities to pursue careers in health sciences by offering a rigorous curriculum and real-world field experiences through collaborations with clinics, hospitals, universities, and other community partners.

Health Science

In this pathway, students will be able to identify careers in healthcare and master foundational health care skills.

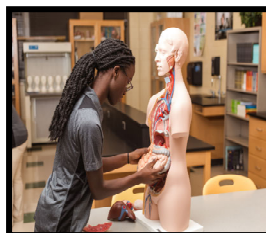

The skills and knowledge that students learn in 1st & 2nd level courses will prepare them for future clinical experiences such as job shadowing or internships.

Students have an opportunity to become a Certified Nursing Assistant (CNA) through this course.

Biomedical Science

This pathway covers basic concepts in biology, medicine and public health. Students work on real-world case studies to understand human body systems, genetics and disease mechanisms.

General Management

DO YOU WANT TO BE YOUR OWN BOSS?

This pathway exposes students to administration industry careers and teaches skills in the managing healthcare entities.

Family Systems & Mental Health

Students will learn how families work together and how family members affect each other. Students will also learn how family relationships can help or hurt someone's mental health. They will learn simple ways families can improve how they get along and how therapy can help families support each other better.
