Backpack Buddies

Nonperishables to feed students through the weekends or holidays

Recipe Builders

You can use any AI platform to type in ingredients you have in your pantry or fridge to make a recipe. You can give it specifics on how many people you need to feed, things to not use, etc.

Saving Left Overs

Eating left overs is a great way to stretch meals. You can reheat them for lunch, or dinner, or repurpose meals. For example, if one night you eat tacos and there is left over meat, you can have chili (or chili dogs) and use the leftover taco meat in your next meal!
