

DCSC CONSTRUCTION UPDATE

Update #21

November 2025

This month, we are thankful for PROGRESS! The progress we've seen at both DCHS and our future transportation building has been incredible, and we are excited to look ahead at all that is to come in 2026.

Keep reading for more detailed updates and photos of our progress!

High School Progress

BIG things are happening at DCHS! No matter where you look (inside classrooms, at the front entrance, around the exterior, or across our athletic facilities), there's exciting progress everywhere.

Several of our older classrooms are currently being renovated, and the new carpet has just been installed! These refreshed spaces will feature design elements that match our brand-new classroom wing at the front of the building.

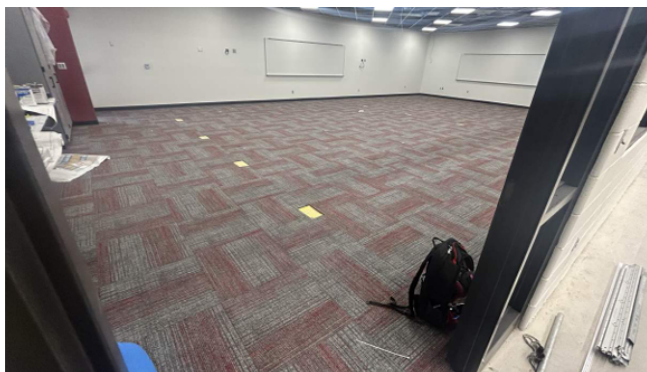

At the new front entrance, the media center is taking shape. With drywall now hung, the space is starting to feel like the vibrant hub it's meant to be.

Another exciting addition: we're building a small coffee shop! The storefront has already been installed, and once complete, this will be the go-to spot for a delicious cup of coffee. It will also be a great source for students to work, learn, and enjoy each other's company.

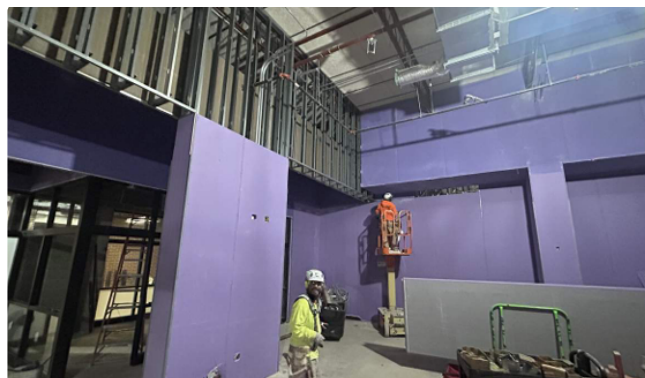

In athletics, the pool is nearing completion, and we're aiming to open it for our swimmers very soon. The softball field is also coming together beautifully, with turf and finishing touches underway.

Outside the building, crews are updating the roof to support all these improvements and prevent future issues. They're also installing a new sidewalk from the school to Mackey Road, making it safer for our students who walk.

There's so much happening at DCHS, and we couldn't be more excited to watch it all come together. Once finished, the entire building will look incredible!

Roof Repairs

Sidewalk Pouring

Transportation

We don't have many "wow" photos to share just yet from the new Transportation Department construction site, but it is definitely moving right along!

Crews are actively working on wall rough-ins, bollards, and door frames. In the aerial photo, you can clearly see the outlines of the walls taking shape and get a sense of just how large the finished structure will be.

They're also pouring a new concrete sidewalk, which will serve as a great safety feature. It will give our drivers a clear, secure path from their cars to the building and then to the buses.

The aerial view also provides great perspective on how the new facility connects with DCMS, showing how everything fits together on campus.
