The MMS Science Department celebrated Halloween Week with lots of hands-on interactive labs and activities! In Mrs. Sibbitt's 6th Grade class, students examined how water moves through celery and photosynthesis in spinach leaves! In Mrs. Cross's 7th Grade class, students learned about the history of candy making, and used deductive reasoning to solve puzzles. In Mrs. Smith's 8th Grade class, students applied concepts of kinetic energy in particles to phase changes and dry ice! Science students in all 3 grades also participated in a guessing game linked to density and volume of objects in a container!
