

Choice Board: Exploring Biology

Assignment Title	Description
Create a Concept Map	Diagram the scientific method and its steps with examples.
Biomolecule Poster	Design a poster showcasing the four biomolecules and their functions.
Chemical Reaction Summary	Write a summary explaining types of chemical reactions with examples.
Matter in Daily Life	Describe how different states of matter are observed in everyday life.
Cellular Transport Infographic	Create an infographic illustrating types of cellular transport with visuals.
Cell Structure Presentation	Prepare a short presentation on the organelles found in plant and animal cells.
Cell Theory Timeline	Construct a timeline that highlights the key developments in cell theory.
Plasma Membrane Model	Draw and label a model of the plasma membrane, showing its components.
Organelles Function Chart	Create a chart listing cell organelles and their specific functions.
Research on Enzymes	Write a brief research paper on how enzymes affect chemical reactions in cells.

Feel free to select any of the assignments that interest you! Each option helps deepen your understanding of cell biology and chemistry concepts.
