

C-26029 Cloud Security, Monitoring & Compliance for Google Workspace & Microsoft 365

The District requested proposals for a cloud-native security platform to monitor, secure, and enforce data protection policies across Google Workspace for Education and Microsoft 365 environments. The preferred solution is *ManagedMethods Cloud Monitor* built for K–12 education, that provides continuous monitoring, threat detection, data loss prevention (DLP), compliance reporting, and student safety monitoring.
