

Computer Literacy NTI Day Assignments

Instructions:

1. This is your NTI work for Computer Literacy.
2. Each NTI day, complete one short written assignment from the list below.
3. Write your name, class, and the day number at the top of your paper.
4. Each response must be at least **5 – 8 complete sentences** (around one solid paragraph).
5. Write neatly and use complete thoughts.

Computer Literacy NTI Writing Prompts:

Day 1 – Artificial Intelligence in Everyday Life

Explain three ways AI is already used in things you see or use every day. Which one helps people the most, and why?

Day 2 – The Pros and Cons of AI

List two benefits and two possible dangers of artificial intelligence. Which side do you think is more important to consider right now?

Day 3 – Ethics and AI

Should robots or AI systems ever make life-or-death decisions (like self-driving cars or hospital machines)? Explain your opinion.

Day 4 – Your Favorite AI Tool

Write about one AI tool, app, or website you've heard of or used (for example, ChatGPT, Snapchat filters, or voice assistants). What makes it useful or interesting?

Day 5 – The Future of Jobs

Do you think AI will take over some jobs in the future? Which ones, and what jobs will still need humans? Explain.

Day 6 – What is Python?

Describe what Python is used for and why so many people like to learn it first. Give one example of something you could build with Python.

Day 7 – How Coding Helps People

Explain how knowing how to code can make the world better or make life easier for others. Give examples.

Day 8 – Debugging Mindset

When code doesn't work, what steps could you take to fix it? How is this skill useful in life outside of coding?

Day 9 – AI vs. Human Creativity

Can AI really be creative? Why or why not? Give an example to support your opinion.

Day 10 – Your AI Idea

Imagine you could design your own AI program or robot. What would it do, and how would it help people?
