

Empowering Learning with the Holy Family 1:1 MacBook Program

Every incoming ninth-grade student receives a MacBook Air laptop to support creativity, collaboration, and academic success. Our 1:1 MacBook Program enhances learning by providing technology as a purposeful tool—used strategically to strengthen understanding—while students continue to engage in rich instruction and meaningful experiences beyond the computer screen.

Powering Learning for All

Standardized devices ensure equity and consistency across devices.

Teachers can plan lessons knowing all students can complete work efficiently and collaborate seamlessly.

Apple's robust suite of apps enhances learning opportunities for all students.

Tech Support & Convenience

On-Site Support: Ensures minimal downtime for repairs and eliminates need for families to schedule appointments at an Apple Store or an Apple Authorized Service Provider after school hours.

Standardized Devices: Consistent teacher and student devices simplify troubleshooting.

Automatic Updates: Device receives automatic software and security updates.

Pre-Installed Apps: No downloads required.

Financial Program & Benefits

Annual Lease: The \$400 annual lease includes a MacBook Air with an M4+ chip or newer, a charger, an HF-branded protective case, AppleCare, and apps.

Tech Management: Holy Family manages all software and updates, content filtering, and tech support.

Repairs Covered: AppleCare protects families from costly repairs and inconvenient trips to repair centers. Holy Family's AppleCare covers a full replacement twice in a calendar year, if necessary.

Classroom Benefits

Easy Collaboration: Students and teachers interact and collaborate easily via native Apple apps.

Teacher Guidance: Teachers can monitor and guide learning, push materials, and manage class devices.

Minimized Distractions: Controlled access minimizes access to apps and messaging.

Accessibility: Students with specific learning needs can use Apple's built-in accessibility tools such as spoken text.

Creative Projects: Assignments can include multimedia creation using Keynote, iMovie, GarageBand, and more.

Recording & Assessments: Built-in microphones and cameras allow recording for projects and assessments.
