

After Care

The Mobile Crisis Response Team is available to follow up with youth and their families to ensure that there is a smooth transition to needed supports and services in the community.

Who we serve

The Rural Mobile Crisis Response Team provides crisis intervention and stabilization services for youth and families of youth under the age of 18 who are exhibiting behavioral/mental health concerns in which the behavior of the child threatens his or her removal from the home, school and communities across Rural Nevada.

Mobile Crisis Response Team

Program Mission:

Rural Mobile Crisis Response Team strives to help children and adolescents live happily and safely in their homes and communities, all across Nevada.

Rural Mobile Crisis Response Teams:

The team supports youth and families in behavioral and mental health crisis situations and helps to find community services for youth and their families. The Rural Mobile Crisis Response Team (RMCRT) is designed to reduce emergency department visits due to a psychiatric crisis and to reduce psychiatric hospitalizations when appropriate by providing immediate support and crisis interventions, short-term stabilization and case management services. Interventions are provided in the community, home, and/or through phone consultation.

Telephone Triage:

Crisis staff are available to provide support over the phone to assist in resolving or preventing a crisis situation. After an intervention screening, a referral will either be made to a community resource or to the Rural Mobile Crisis Response Team clinician.

Crisis Response:

If it is determined that further care is needed, a response team will respond to the youth and family in crisis. The response team will work to de-escalate the crisis and provide interventions to stabilize the crisis.

Crisis Stabilization:

Crisis stabilization is a short-term, mental health intervention provided in or outside of the youth and family home. Clinical services will be provided in-person or via telehealth. It is designed to assess, manage, monitor, stabilize and support the youth's well-being. The team may develop an individualized crisis and/or safety plan with the family to help support the youth.

Goals:

- Support and connect
- Promote youth involvement
- Reduce hospitalizations
- Facilitate hospital discharge
- Assist in linking

Values:

- Respond to families' health care needs
- Reduce psychiatric hospitalizations
- Provide cultural competent care
- Assure through implementation
- Facilitate provide
