

WAS BUNU POISONED?

Hilda, Gudalupe, kimberly

1

claim

"The coffee," whispered the gentleman, so low I could barely hear. "I suspect it contained radioactive poison ... The poison causes symptoms that mirrored leukemia" (pg.161)

2

claim

"They were poisoning Bunu. They were serving him irradiated coffee!" (pg. 213)

3

A real life example is Alexander Litvinenko there was radiation detected in the blood they realized it was polonium-210 it destroyed his cells and his immune system

conclusion

We believe Bunu was poisoned by the Securitate, they put radioactive poison in the coffee he was drinking. They believed he was rejecting the policy Romania established. They didn't like that he knew how oppressive Romania had become so they poisoned him to get rid of him in hopes that a rebellion wouldn't form.
