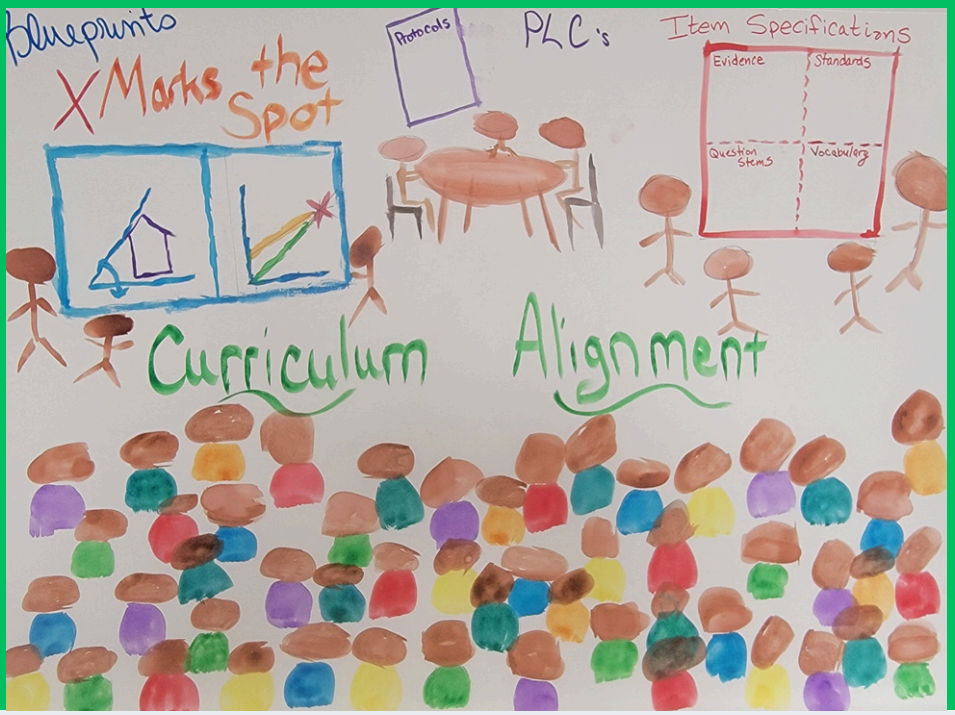
Curriculum Alignment



CURRICULUM ALIGNMENT: BUILDING A STRONG FOUNDATION FOR STUDENT SUCCESS

The Curriculum Alignment component of the Bright Futures Project is progressing with great momentum. This year's focus has been on developing a shared understanding of academic standards and assessment expectations across all grade levels to ensure coherence and consistency districtwide.

KEY HIGHLIGHTS:

- All teachers, instructional coaches, and administrators participated in professional learning on CAASPP Blueprints and Item Specifications.
- Training provided an in-depth look at state standards, claims, and targets assessed on the CAASPP.
- Educators explored vocabulary, question types, and item stems to better understand grade-level rigor.
- These sessions established a common foundation for curriculum alignment across schools and grade levels.
- Teams are now collaborating to develop a 5x5 Matrix and five common assessments per grade level, ensuring coherence, consistency, and high expectations for all students.
