

RFP Field Questions

1. How would you suggest we structure any programming to best serve the students?

There is no set guideline for the goal of supporting students in the Oak Grove District and specifically the Davis community. Please provide in the proposal ways you could support District students and programs with participation in your activities, contributions to site activities and programs, or other community benefits to the District.

2. If there is time we are not using, would it be possible to sub-lease the space to another entity?

There is no prohibition to subletting, but it is generally not encouraged in District agreements. Full responsibility would be held by the party carrying the license.

3. Would the District be open to a partnership with another sports group to share the space and maximize the usage?

Organizing the proposal in conjunction with another sports group would be a possibility. However, there must be a primary holder of the license agreement that carries the responsibilities and obligations of the agreement. The District would not be open to shared responsibility between two groups.

If multiple groups apply, and the request is for different times of use. The District may consider creating more than one license agreement. This could be a possibility if the times of use did not overlap with other users.

4. What are the exact dimensions of the 11v11 and 9v9 soccer fields?

Attached is the drawing of the stadium with dimensions of various fields.
