Lease Levy Update: Transition Program Building

Dr. Tyrone Brookins, Assistant Superintendent
Alexander Slocum, Construction Project Manager
Marc DuBois, KOMA Architects

Transition

VISION

- A nurturing learning environment where students proudly maintain and share their **space with the community**. We see students developing crucial skills in employment, home living and post-secondary exploration.
- Our facility will have **collaborative and flexible spaces** tailored to the unique goals of transition-aged students and the diverse needs of learners.
- We envision a space that supports the spectrum of student skills, ensuring their social, emotional and physical safety.
- **Bright, open, and welcoming** spaces filled with natural light fostering happiness among students and staff.
- Our multi-functional common areas are inclusive and accessible, **showcasing hands-on activities** and provide space for students to proudly display their work.

Transition

PROJECT SCOPE

- Renovation of existing building with a new addition to create classroom, learning lab, office, and large multipurpose spaces to serve up to 120 students with 50 staff members.
- Develop outdoor spaces for movement and as extensions of work-based learning, horticulture, and Maker Spaces.
- Space to foster collaborative work and connection to wider community through a small-scale marketplace
