

WHAT CAN OUR WATER STATIONS TELL US? WATER USE

AUDIT

WHAT DOES THE WAY WE USE WATER REVEAL ABOUT OUR SCHOOL?

Clean water is valuable and every refill counts. Your school's bottle filling stations help reduce plastic waste and protect our environment. When you check the stations each month, you help the whole school understand how much waste we are preventing.

WHAT YOU'LL NEED:

Log sheet or piece of paper

Pen or Pencil

Phone or calculator

STEP-BY-STEP INSTRUCTIONS:

- 1 Visit each filling station.** Look for the screen that shows bottles saved.
- 2 Record the number** exactly as it appears. If a station is turned off or not working tell an adult.
- 3** When you finish all stations **add your total bottles saved.**
- 4** Complete your log and **turn it in.**

STUDENT SUCCESS TIPS:

 Walk (don't run) safely and stay with your team.

 Write numbers neatly and keep your notes clear.

 Aim to beat last month's total.
