

Yearbook+® extends the yearbook experience beyond the limits of print, adding more coverage without adding more pages. Students unlock a personalized digital gallery linked to their yearbook portrait that includes every photo they've been tagged in throughout the year for more students, more stories and more moments, all within the same book.

ORGANIZED FOR YOU

One of the hard parts of yearbook is managing all the content. Yearbook+ changes that by organizing tagged photos by student and by yearbook topic through your school's Image Library. That makes it easier than ever to include students and activities, with even more coverage from the entire school year.

THE STORY CONTINUES

Not every photo can fit in the printed yearbook. Yearbook+ expands coverage with digital galleries linked to each student portrait to include more authentic moments and unique stories — because every student deserves to be seen and celebrated in the yearbook.

CONTENT WITHOUT LIMITS

With Yearbook+, storytelling is a community effort. Anyone can share in the process by tagging, creating a more inclusive yearbook that reflects how every student sees themselves and each other. The result is broader coverage without increasing your staff's workload.
