Name: Robert Lefrandt	Grading Quarter: 4	Week Beginning: Wk4 04/08/2024
School Year: 2023-24	Subject: Automation & Robotics	

Monday

Notes:

Notes:

Robotic Assemblies Mechtronics

Engineering: ReEngineering Reverse Engineering

Structural Chassis frame body

Mechanical (Motion) Gear: Box, train, parallel (linear) stack (vertical), ratio, torque speed

Electrical (Ohm's Law, Parallel/Serial Circuits) Chemical electrochemical

Physical Magnetism Batteries

Software Block PLC ladder logic, CNC, Python, C++,

Sensors Bump/touchDistance Light Camera

Physical Computing

AI Data Collect DataAnalyze

Collaborate with schools, 'Industry ProfessionalCommunity

NASA, Honeywell

04/08/2024 BRHS Robotics –

Objective:
Apply basic **engineering principles** and technical skills for... artificial intelligent (AI) management ...the principles of robotics, design, operational testing, system maintenance, repair procedures, robot computer systems, and control languages.

(AZ CTE Automation & Robotics-Program Description)

- PERFORM ELECTRICAL AND ELECTRONIC TASKS
- ANALYZE PROGRAMMABLE LOGIC CONTROLLER (PLC) SYSTEMS ***& (Block, C/C++, Python)***
- PERFORM DRAFTING TASKS-Make dimensional CAD drawings (e.g., 2D and 3D)
- DESCRIBE THE OPERATION AND USE OF VARIOUS FORMS OR ELECTRICAL MOTORS
- Explain the operation and use of DC motors in automation controls
- PERFORM MECHANICAL SYSTEMS LINKAGES TASKS
- APPLY SENSOR SOLUTIONS
- DEMONSTRATE SAFE AND PROPER USE OF ELECTRONIC AND OTHER LABORATORY EQUIPMENT, TOOLS, AND MATERIALS

Lesson Overview: Workflow Process:

1st Semester Students:

- Login to VEX Certification Accounts:
- VEX V5 ,Block Programming, Python Programming, Workcell
- Remote Control and building VEX V5 Robots -Speedbot/Base Bot
- Coding-Block/Python/C/C++
- **Vexcode, vr.vex.com (sim) team# & code, over/under playground, scoring, sensors**
- Sensors :Bump/touch, Distance, Line Tracker, Camera, , AI, Data Analysis
- Industrial Internet of Things (IIOT) R-Pi & Arduino kits

***Customizing Robots and Parts : After Completing 1st Semester Skills

2nd Semester Plus+ Students:

- Custom:
  - Battlebots, solder
  - Flywheel, trebuchet, catapult, striker (intake)
- Login to VEX Certification Accounts: (Complete Certifications)
- Tinkercade(Autodesk)/PHET(Physics-Engineering-Tech) Univ-Colorado
- 3D Modeling, Electric circuits, Arduino IDE – C/Python Code
- Protyping: 2D Sketch > 3D Modeling > 3D Settings > 3D Printing
- Inkscape > Tinkercad > Ultimaker Cura > Ultimaker
- **Autodesk Tinkercad Team Fusion 360/Solidworks**: Combine 2d Sketch/3D Modeling
- Arduino R4 W (C/C++)/Raspberry Pi – Pico Bluetooth/WiFi (Python)
- IOT: House Starter kits, Radio, Speakers (bluetooth)

Precision Machining :

- Manual/Traditional - Mill and Drill , **Pen Kit**
- CNC –ComputerNumeric Control –G/M Code
  - **eXpertMill VMC-0600 Milling Machine**
    - Reinstall software/ReplaceComputer Workstation w/compatible card slot

Academic Standards:

Academic Standards:

Arizona Career and Technical Education Professional Skills have 9 areas of measurement:

www.azed.gov/cte/profskills/

www.azed.gov/sites/default/files/2022/08/PrintablePreassessment.pdf

1. Communication
2. Collaboration / Teaming Abilities
3. Thinking and Innovation / Problem Solving
4. Professionalism / Formal Behavior
5. Initiative and Self-Direction / Leadership
6. Intergenerational and Cross-Cultural Competence / Acceptance and Inclusion
7. Organizational Culture / Values
8. Legal and Ethical Practices / Safety
9. Financial Practices

Tuesday

Notes:

Robotic Assemblies Mechtronics

Engineering: ReEngineering Reverse Engineering

Structural Chassis frame body

Mechanical (Motion) Gear: Box, train, parallel (linear) stack (vertical), ratio, torque speed

Electrical (Ohm's Law, Parallel/Serial Circuits) Chemical electrochemical

Physical Magnetism Batteries

Software Block PLC ladder logic, CNC, Python, C++,
