USE OF TECHNOLOGY IN INSTRUCTION

The North Middlesex Regional School Committee recognizes the need for students to be prepared to contribute to and excel in a connected, global community. To that end, the district provides ongoing student instruction that develops digital citizenship skill sets. Information and communication technology are an integrated part of the curriculum across subjects and grades in developmentally appropriate ways and are aligned with the Massachusetts Curriculum Frameworks, including seeking knowledge and understanding; thinking critically and solving problems; listening, communicating, and interacting effectively, and engaging and competing in a global environment.

Students shall use digital resources in a responsible, efficient, ethical, and legal manner.
