5516. USE OF ELECTRONIC COMMUNICATION DEVICES

To support school environments in which students can fully engage with their classmates and their teachers, and to focus attention upon instruction, the Board of Education has determined the use of cell phones and other electronic communication devices by students for personal use during the school day and school activities should be limited.

As used in this Policy, "electronic communication device" includes any device with the capability to audio or video record and/or is capable of receiving or transmitting any type of communication with others. An electronic communication device includes, but is not limited to, any type of cameras; cellular and wireless telephones; pagers/beepers; laptop computers; watches; electronic readers; two-way radios; any audio or video broadcasting devices; ear buds; tablets; headphones; and any other device that allows a person to audio and/or video record and/or transmit, in either a real time or a delayed basis, video or still images, text, audio recordings; or other information.

The Board adopts Regulation 5516 and this Policy to address student use of an electronic communication device for personal use on school grounds during the school day.

Permitted Use

Students may use electronic communication devices only during the following times or locations:

- During lunch periods (high school only)
- When specifically authorized by a teacher for instructional purposes
- On a school bus, if permitted by the Principal or designee
- In the main office or nurse's office, with explicit permission from the nurse or administrator

Prohibited Use

Under no circumstances may students use electronic devices to record, photograph, or communicate in restrooms, locker rooms, shower areas, or any other location where individuals have a reasonable expectation of privacy.

Nothing in Regulation 5516 and this Policy shall prohibit a student from using an electronic communication device for a purpose documented in a classified student's Individualized Education Plan (IEP) or a plan developed under Section 504 of the "Rehabilitation Act of 1973," 29 USC 794. A student may use an electronic communication device to monitor or address a health condition with prior permission from the Principal, in consultation with the school nurse to be documented in the student's Individual Health Plan.

In addition, the Board believes students and/or school staff members should not be subject to having any type of recording taken of any student(s) or school staff member(s) during a school day for any purpose without the consent of the student and the student's parent or the school staff member. In addition to protecting the privacy rights of students and school staff members, the Board recognizes such recordings can be disruptive to the educational program. Inappropriate recordings of educational material, student assessment instruments, and/or student assessment reviews can be used to compromise the integrity of the district's educational program or lead to academic dishonesty in the event such recordings are stored and/or transmitted to other students.
