Now, due to budget cuts, the School is no longer offering certain classes – art classes, special programs, etc. She asked the Town Council to support the School Board’s recommendation.
- Robert Rovner of King Street stated that he was confused with the comments with regards to the Schools are not being funded in that the School was still getting a \$2million dollar increase. He recommended that the Council go with the School Budget from last year.
- Jackie Perry of 215 Black Point Road and a member of the Board of Education thanked the Council for changing the start time of the meeting due to Baccalaureate. The Council does have the opportunity to raise money, the School does not. She then asked that Town Council to not cut the School Budget any further.
- Doug Freedman of 17 Lillian Way reviewed data from the State on monies that communities spend on its students – Scarborough spends approximately \$9,600 on each student. - Jane Ling of Abigail Way and a member of the Board of Education and a member of its Finance Committee went on to speak on the budget and the additional \$138,000 that was cut and how it will affect the future of the School. There should be no further cuts.
- Lisa Douglas 3 Mayflower Drive and teacher in the system stated that the schools are doing an amazing job. The Town needs to prioritize the wants and needs. Please do not cut the budget any further.

- Donna Beeley of Gunstock Road and a member of the Board of Education – felt that there is a number of misinformation being put out to the public. The information coming from both sides should be the same. The Board is trying to recoup the loss of 41 positions in 2009/2010.

He asked the Council to stand up and do the flat funding.
- Milt Blevins of 14 Bonney Grove Drive spoke on the School Budget and he did not want to live in a town that underfunds its school.

**Proposed Amendments to the Zoning Ordinance
to Create a Transmission Tower Overlay District and
Update the Performance Standards:**

BE IT HEREBY ORDAINED by the Town Council of the Town of Scarborough, Maine, in Town Council assembled, that the following amendments to the Zoning Ordinance of the Town of Scarborough, Maine, be and hereby are adopted:

1. Amend the PERFORMANCE STANDARDS for TRANSMISSION TOWERS as follows (additions are underlined; deletions are struck through):

F. PERFORMANCE FOR STANDARDS--TRANSMISSION TOWERS AND TELECOMMUNICATION FACILITIES

1. -Transmission Towers - All new transmission towers or the increase in height of an existing transmission tower shall conform to the following standards and be reviewed and permitted under the Site Plan Review Ordinance by the Planning Board, unless the changes to the tower comply with subsection 11. below. The purpose of these standards are order to minimize adverse visual effects of transmission towers through careful design, siting, and vegetative screening; and to avoid potential damage to adjacent properties from tower failure and falling ice through proper engineering; to promote the collocation of service providers and the careful siting of tower structures; and to protect the public against any adverse impacts on the Town's public health, safety and welfare. transmission towers are subject to the following standards:

- 1a. No transmission tower shall exceed 400-150 feet in height as measured from the base of the tower to the highest point of the tower, including any attached receiving or transmitting antennas and devices.
- 2b. The base of the tower shall be set back from all property lines by a distance equivalent to 100% of the total tower height, including any attached transmitting or receiving antennas and devices. Accessory structures and guy wire anchors shall meet the minimum setbacks for the zoning district. The Planning Board may relax the 100% of the total tower height setback standard if the applicant secures a restrictive easement(s) from the abutting property(s) that allows for a lesser setback. The restrictive easement shall restrict the uses and structures within the easement area so as to allow the tower to be located closer to the property line than the 100% requirement above. A restrictive easement from an abutting property shall not however enable a tower to be sited closer to the abutting property line than the minimum front, side and rear yard setback requirements of the zoning district.
- 3c. Towers which are not subject to specific painting or color or lighting standards imposed by any federal or state agency shall have a galvanized finish or be painted in a sky tone above the top of surrounding trees and in an earth tone below tree-top level or exhibit a similar camouflaging architectural treatment as determined by the Planning Board.
- 4d. Towers and attached antennas and devices shall not be artificially lighted, unless required by the FAA or other federal or state agency. If lighting is required, the Planning Board may review the available lighting alternatives and require the design that would cause the least impact to surrounding properties and views.
- e. All new transmission towers shall be designed and constructed to accommodate collocation of additional antennas, equipment and facilities on the tower and site. To meet this standard the applicant, owner and all other tower users shall allow other commercial wireless telecommunication service providers using functionally compatible technology to collocate; shall provide a mechanism for the construction and maintenance of collocated antennas and infrastructure; and shall provide for reasonable sharing of costs in accordance with industry

standards. To ensure colocation and prevent the need for additional new towers within the same coverage area, the Planning Board may require an existing or new tower to be increased in height up to the maximum height allowed and/or make other accommodations in order to provide for colocation. When designing a tower and site for colocation the facility should be designed to accommodate the inclusion of at least three additional telecommunication service providers. The Planning Board may waive the requirement for colocation or the number of additional providers to be colocated, but only after the Planning Board reviews and determines with satisfactory evidence that technical constraints prohibit colocation.

f. No advertising or signage is permitted on transmission towers or any attached transmitting and receiving antennas or devices.

g. Unless existing vegetation provides a buffer strip at least the width of the minimum yard requirements for the zoning district, all property lines along roadways or visible to existing abutting or nearby buildings (within a one-quarter mile radius) shall be landscaped as follows or greater:

Ai. Six to eight foot evergreen shrubs shall be planted in an alternating pattern, 5 feet on center, within 15 feet of the property boundary.

Bii. At least one row of deciduous trees, not less than 2 ½ inches to 3-inch caliper measured 3 feet above grade and spaced not more than 20 feet apart shall be planted within 25 feet of the site boundary.

Ciii. In lieu of the foregoing planting requirements, the Planning Board, during the site plan review process, may determine that existing vegetation may be supplemented to achieve an equivalent means of minimizing visual impact.

5h. In order to review the suitability of the existing or proposed buffer strip, vegetative screening, the proposed color or camouflaging treatment for the tower, and the overall visual effects of the tower, the Planning Board may require photo simulations of the tower within the landscape from a variety of perspectives.

i. As part of an application there must be a radio frequency coverage analysis showing existing or planned wireless facilities within 10 miles of the proposed location. Maps shall be supplied that indicate on street and in building coverage for both exiting/planned sites and the proposed location. The coverage analysis for the proposed location must show all available optional antenna heights if it is a co-location or all possible antenna heights starting at a minimum of 90 feet if it is a new facility. The coverage analysis must use each current licensed frequency band by the applicant.

j. Transmission towers erected after May 17, 1995 shall meet all applicable requirements of federal and state regulations and shall be designed and installed in accordance with the standards of the Electronic Industries Association (EIA) Structural Standards for Steel Antenna Towers and Antenna supporting Structures.

6k. Transmission towers existing before May 17, 1995 which do not comply with these performance standards or with the use or dimensional requirements of the zoning district in which they are located may continue to be used subject to the provisions of Section III of this Ordinance. The addition, removal or relocation of transmitting or receiving devices on such towers does not constitute the expansion or enlargement of the nonconforming use and does not require review under the Scarborough Site Plan Review Ordinance, provided the total height of the transmission tower, including attached devices, is not increased.

l. A transmission tower and associated facilities that is not operating for a continuous twelve month period shall be considered abandoned. The Code Enforcement Officer shall notify the owner of an abandoned facility in writing and order the removal of the facility within ninety (90) days of receipt of the written notice. The owner of the facility shall have thirty (30) days from the receipt of the notice to demonstrate to Code Enforcement that the facility has not been abandoned. If the owner fails to show that the facility is in active operation, the owner shall have sixty (60) days to remove the facility. The removal of the facility shall include removing the tower and associated facility and returning the site to its pre-construction condition including removing of roads and replanting vegetation.

If the facility is not removed within this period, the Town may remove the facility at the owner's expense. A copy of the relevant portions of a signed lease or other comparable signed legal instrument which requires the applicant to remove the tower and associated facilities and reclaim the site upon abandonment shall be submitted as part of the application.

m. Transmission towers shall not be allowed within any Shoreland Zoning District, including the Shoreland Overlay District.

2. Telecommunication Facilities – The purpose of these standards are to minimize any adverse visual effects of telecommunication facilities through careful design in attaching these facilities to buildings and structures so that these facilities are compatible and consistent with the building's design and architecture; to ensure proper engineering in the installation of these facilities; and to protect the public against any adverse impacts on the Town's public health, safety and welfare. In those zoning districts where telecommunication facilities are allowed as a special exception use, the Board of Appeals may issue a special exception for the installation of a telecommunication facility. In addition to meeting the standards for special exceptions in Section IV.(I)4, the follow standards below also apply. In those zoning districts where telecommunication facilities are permitted uses they shall conform to the following standards and be reviewed and permitted under the Site Plan Review Ordinance by the Planning Board.

a. If a telecommunication facility is proposed to be mounted or attached to the exterior of a building or structure the facility shall be designed and located in a manner that is consistent and compatible with the architecture of that building or structure. If applicable, the addition of a facility to the exterior of a building shall also comply with the Design Standards for Scarborough's Commercial Districts, including the standards for rooflines and roof mounted equipment.

- b. Ground mounted equipment associated with, and accessory to, the telecommunication facility may be allowed through Board review and approval provided the Board finds there is adequate screening of this equipment and that is compatible with the site.
- c. Exemption - Telecommunication facilities that are proposed to be full enclosed within an existing building and will not be altering the exterior dimensions of the building or the exterior appearance of the building to accommodate the facility, shall be exempt from special exception review by the Board of Appeals or site plan review by the Planning Board. These installations may be permitted through review and approval by the Code Enforcement Officer. Ground mounted equipment associated with, and accessory to, the telecommunication facility may be allowed by the Code Enforcement Officer provided there is adequate screening of this equipment and that is compatible with the site.

Section 31. SCARBOROUGH POLICE DEPARTMENT WRECKER POLICY [December 1, 1993] [amended 06/21/2006]

PURPOSE

In order to protect motorists within the Scarborough Town Limits, to insure streets and public ways remain open and free of hazards, to insure efficient enforcement of traffic, parking, snow removal and other regulatory ordinances, it is necessary to set a policy to regulate wrecker companies used by the Scarborough Police Department. A **Wrecker Policy** will be established to regulate towing and services, storage and disposition of vehicles towed and to establish rates for these services.

POLICY

The Scarborough Police Department will maintain a rotation list of wrecker companies approved for use by the Police Department, for towing and service. The list will be used for all normal routine calls town wide and the next due wrecker will have 30 minutes to arrive at the scene of the town (**SEE Regulation "II-C"**). If a towing company is unable to tow, it will be the responsibility of the Scarborough Police Department to assign a replacement wrecker, not the company originally called. Nothing in the foregoing paragraph will prevent the Scarborough Police Department in emergency situations from calling the closest available wrecker.

If the emergency deems the closest available wrecker be called, it will not be logged against the company called and they will not lose their place on the rotation list.

I. INSURANCE

The following policies will be on file with the Chief of Police.

III. SOLICITATION OF BUSINESS

No wrecker operator may respond to the scene of an accident or emergency for the purpose of towing vehicles unless specifically called there by the Scarborough Police Department or persons involved in the accident or emergency. This does not prevent the wrecker company from contracting with any person, firm or corporation. It does not prevent soliciting a contract at the scene of an accident or emergency.
