December 1, 2025

Dear Miller Place School District Community,

As per the New York State Department of Health regulations, the District contracted with J.C. Broderick & Associates, Inc. to collect water samples to test for lead contaminant. This is required every five years in school districts. The last testing was performed in 2021. The results can be found on our website (click link) Departments, Facilities, Lead Testing Info.

The firm collected water samples from 152 locations throughout Andrew Muller Primary School, Laddie A. Decker Sound Beach School, North Country Road Middle School, Miller Place High School and the Administration Building. The collection of water samples was by licensed professionals and done in accordance with the United States Environmental Protection Agency (EPA) protocols, which determines the standards for school drinking water.

We have received a preliminary report, and we are scheduled to receive a final report on December 10, 2025. We are taking the following action prior to the final report:

- We have turned off outlets or placed signage by faucets identified.
- The remediation process will begin immediately.

Once we receive the final report, I will send out a follow-up message that will include J.C. Broderick's cover letter, outlining the process they completed with the final report.

The health and safety of our students, staff, parents, guardians and visitors is our utmost priority.

As always, thank you for your support.

Thank you,

Seth Lipshie
Superintendent of Schools
