

ThreeSchool E-Learning Choice Board

Have fun!

Caregivers, choose one activity from each area to complete with your student.

Social Emotional	Mathematics	Motor	Language / Literacy
Caregiver, help student put stuffed animals/dolls in a circle (or just the two of you) and have a pretend group time. Sing 2 of your favorite songs.	Go on a shape walk inside. Find things shaped like a circle, a square, a triangle, a rectangle, or another shape you know.	Have student move small objects from one container to another using their thumb and forefinger. (legos, cotton balls, small toys, q-tips etc.)	Using a dining room or living room chair, have student practice positional words. Caregiver can ask student to hide <u>behind</u> the chair, stand <u>next to</u> the chair, sit <u>on</u> the chair, stand <u>in front of</u> the chair, or crawl <u>under</u> the chair (if possible).
Caregiver, make a silly face and ask student to copy you. Try a happy face! An angry face! Ask your student to identify the different emotions.	Caregiver, support student to line up one shoe from each family member in order from smallest to largest.	Caregiver, have student follow you while encouraging them to take different types of steps: giant, tiny, soft, stomping, or skating steps and more as you make your way throughout your home.	Under a blanket, caregiver read a favorite book to student using a flashlight in the dark!
