Summer 2025 Facilities Upgrades

July, 2025

Dobbs Ferry School District
Independent Thinkers Change Worlds

Facilities Upgrades Overview

In addition to the Phase 2 Capital Project, the Energy Performance Contract Project, and the Capital Outlay Project detailed on this website page, the district also allocates monies in the general fund budget each year to complete smaller projects that do not require the certification of our architects and engineers, or the approval of the state education department.

This summer, we are continuing the recurbing/repaving project at the front of the high school that will further enhance the restoration work started last year.

We will post pictures of our progress over the course of the summer to keep you updated.
